

Heatherwood School Curriculum Statement

Intention

Heatherwood School believes the child to be the curriculum. Through bespoke curriculum pathways, pupils' learning experiences are organized to form a personalised learning journey through which the unique experiences, skills and abilities of each and every one are developed. These carefully scaffolded learning opportunities provide pupils with the chance to apply their skills to real life situations therefore promoting greater independence. It is these same experiences that allow children to extend their understanding of the world around them; each child creates their own learning story to tell.

Our vision:

Our curriculum framework is based on the **C**are we give to all pupils, the **O**pportunities we facilitate, through **R**eal life experiences and situations providing their right to an **E**ducation
