

CORE Curriculum Intent

Heatherwood School believes the child to be the curriculum. Through bespoke learning pathways, pupils' learning experiences are organised to form a personalised learning journey through which the unique experiences, skills and abilities of each and every pupil are developed. We give pupils the opportunity to use their skills in real life situations, promoting greater independence. It is these same experiences which allow our pupils to expand their understanding of the world around them. At Heatherwood, each child creates their own learning journey.

Communication

Reading
Writing
Phonics
Access to my environment
Communicating
Building relationships

Personal, Social + and Emotional
