

CORE Curriculum Intent: P16

Heatherwood School believes the child to be the curriculum, and this continues in Post 16. Through bespoke learning pathways, pupils' learning experiences are organised to form a personalised learning journey through which life skills and independence can be fostered. In Post 16, trips and visits increase to allow young people to access the community in a way which is meaningful to them, developing their confidence and functional skills outside of the school environment.

Towards Employment
